Preliminary Amendment 1.53(b) Continuation of 10/062,437

AMENDMENTS TO THE SPECIFICATION

Amend the specification by inserting before the first line the sentence:

This is a continuation of Application No. 10/062,437 filed February 5, 2002; the disclosure of which is incorporated herein by reference.

Please delete the present Abstract of the Disclosure and replace it with the following amended Abstract of the Disclosure.

The present invention provides a A polarizing plate comprising which has a polarizing layer having a thickness of about 20 nm to about 1500 nm formed by rubbing at least one surface of a substrate, coating the rubbed surface of the substrate with an aqueous solution containing a dye having a tabular molecular shape, and drying the solution. This polarizing plate is a thinner polarizing plate with a high degree of polarization and suitably applicable to portable electronic equipment such as cellular phones, portable information terminals, smart cards and IC cards.
